# HARMONY End Users' Group

Annarita Leserri

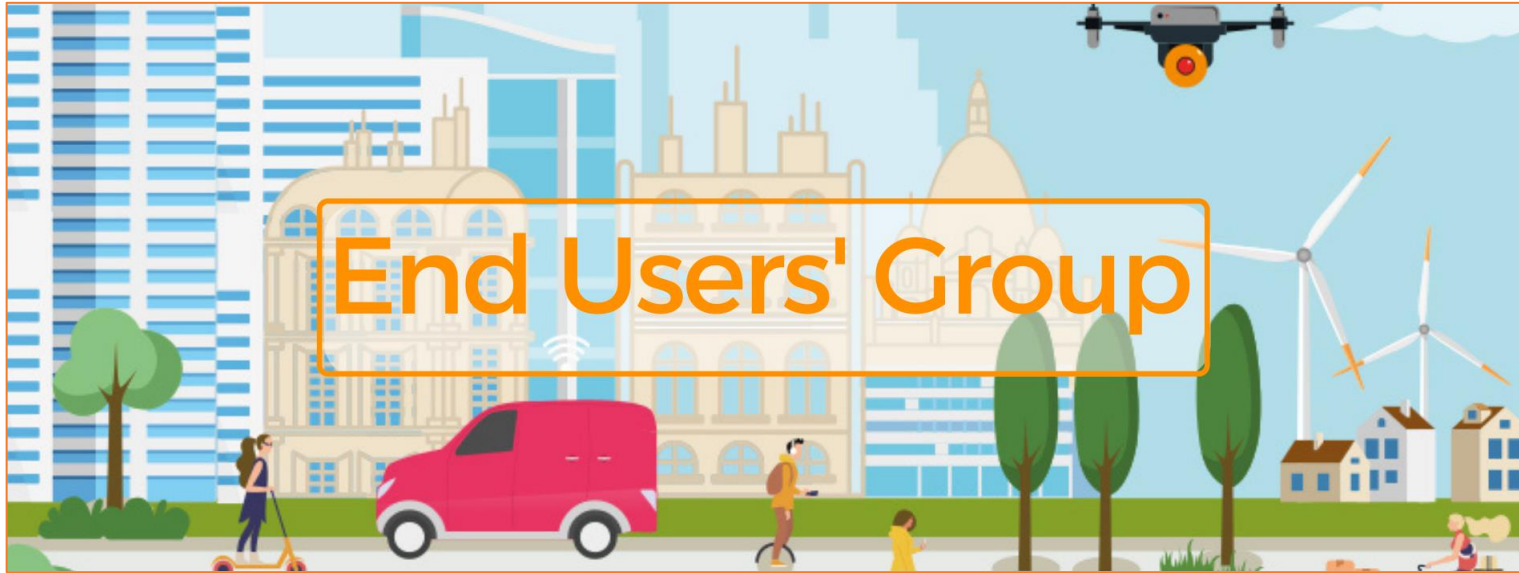

*enide*

## HARMONY engagement activities and collaborations

HARMONY organises a number of stakeholder engagement and collaboration activities with other H2020 projects and European R&D platforms and initiatives.

It is a board gathering both internal and external stakeholders from cities and metropolitan areas:

- transport actors,
- city and region authorities,
- service providers,
- policymakers,
- standardisation bodies
- other public authorities

It provides end-users' perspective on the project co-creation activities and promotes the adoption of the HARMONY developments. The EUG will be a **dynamic board** welcoming new members throughout the project lifetime.

## The End Users' Group in numbers

# Why the End Users' Group?

## **Stay in the know**

Keep abreast with all the innovations related to HARMONY, including the piloting of drones and automated vehicles, and with their implementation in the six metropolitan areas of the project.

## **Keep safe, but keep connected**

We are making it easy for mobility stakeholders to keep connected, while keeping safe.

## **Receive insights**

Get detailed news about HARMONY's progress and the latest updates on spatial and transport planning.

## **Network**

Cooperate with some key partners that are pioneers of sustainable mobility innovation in Europe and beyond.

# Shaping a new mobility era

The participation in the HARMONY End Users' Group takes several forms:

- to keep updated with HARMONY developments (i.e. follow our social media, subscribe to the newsletter, etc.);
- to participate in workshops, webinars, interviews, surveys, etc.;
- to help HARMONY evaluate the proposed innovations and perform the required corrections according to the end users' needs and expectations;
- to help recruit participants for primary data collection;
- to discuss the final outputs resulting from co-creation activities;
- to help reach consensus regarding the proposed solutions for key issues.
